EXECUTIVE SUMMARY

CJ4 is a ten-year experiment in constitutional monetary policy.

The project was founded upon a simple belief:

Strong systems are built upon clear rules.

CJ4 seeks to explore whether a transparent monetary framework based upon fixed supply, predictable scarcity, and community participation can create a durable ecosystem focused on long-term conviction rather than short-term speculation.

The network begins with a maximum supply of 1,000,000,000 CJ4.

No additional units shall ever be created.

Supply reduction mechanisms, governance participation, and annual Independence Burns are designed to encourage long-term thinking while preserving the integrity of the project's constitutional principles.

The purpose of CJ4 is not to make promises regarding future market outcomes.

The purpose of CJ4 is to establish a set of transparent rules and allow the community to observe the results over time.

THE PROBLEM

Many modern financial systems operate through continual expansion.

Supply can increase.

Rules can change.

Incentives can be modified.

Participants are often required to place trust in future decisions that have not yet been made.

CJ4 explores an alternative approach.

Instead of continual expansion, CJ4 begins with a fixed supply.

Instead of discretionary monetary policy, CJ4 follows a constitutional framework.

Instead of rewarding short-term speculation, CJ4 seeks to reward conviction, patience, and participation.

The project asks a simple question:

What happens when monetary rules are established in advance and maintained over a period of ten years?

THE CJ4 HYPOTHESIS

CJ4 is founded upon the hypothesis that transparent and predictable monetary policy encourages stronger long-term participation than systems driven primarily by speculation.

The project seeks to determine whether a community operating under fixed monetary rules can sustain engagement, trust, and ecosystem growth over a ten-year period.

The hypothesis is not based upon guarantees.

The hypothesis is based upon observation.

CJ4 exists to test whether constitutional discipline can create a stronger foundation for a digital asset ecosystem.

FOUNDING PRINCIPLES

Principle I – Fixed Supply

The maximum supply of CJ4 shall be permanently fixed at 1,000,000,000 units.

No future minting shall ever occur.

Principle II – Transparency

All major governance actions, treasury activity, burns, and constitutional amendments shall be publicly documented.

Principle III – Scarcity Through Discipline

CJ4 utilizes predictable supply reduction mechanisms to encourage long-term monetary discipline.

Principle IV – Independence

The annual Independence Burn shall occur every July 4th.

Principle V – Long-Term Participation

The project seeks to reward conviction, commitment, and patience rather than short-term speculation.

TOKENOMICS

Maximum Supply:
1,000,000,000 CJ4

Founding Treasury:
11.5%
115,000,000 CJ4

Public Ecosystem Allocation:
88.5%
885,000,000 CJ4

No Future Minting:
Permitted under any circumstances.

Transaction Burn:
A percentage of every transaction shall be permanently removed from circulation.

All burns shall be publicly visible and verifiable.

The Founding Treasury shall be utilized for:

Development

Security Audits

Infrastructure

Community Growth

Project Operations

Treasury activity should remain publicly transparent whenever possible.

INDEPENDENCE BURN POLICY

The Independence Burn serves as the cornerstone of CJ4's monetary policy.

Founding Period

2027 Burn:

10%

2028 Burn:

10%

The purpose of these burns is to establish credibility and demonstrate commitment to the project's constitutional principles.

Governance Period

Beginning in 2029, eligible participants may vote annually on the burn percentage.

The approved burn percentage must remain within constitutional limits established by the network.

Voting shall conclude on July 3rd.

Results shall be published publicly.

The burn shall be executed on July 4th.

GOVERNANCE

Governance participation is reserved for individuals demonstrating both conviction and commitment.

Voting Eligibility

Minimum Holding:
100 CJ4

Minimum Holding Period:
90 Consecutive Days

Voting Power

Voting power shall consider:

<u>Token Holdings</u>

<u>Holding Duration</u>

The purpose of the governance model is to balance conviction and loyalty.

The network seeks to reward participants who demonstrate both confidence in the project and commitment to its long-term success.

Future governance formulas may be refined through constitutional processes while preserving the project’s core principles.

TREASURY AND FOUNDER COMMITMENT

The Founding Treasury exists to support the growth and sustainability of the CJ4 ecosystem.

Treasury resources may be used for:

Technology Development

Security Improvements

Community Expansion

Strategic Partnerships

Infrastructure Costs

The treasury is intended to serve the ecosystem rather than any individual participant.

Transparency regarding treasury activity is strongly encouraged and should remain consistent with the principles of the project.

THE TEN-YEAR ROADMAP

Years 1–2

Launch CJ4

Execute Founding Burns

Establish Governance

Build Community

Years 3–5

Expand Participation

Refine Governance

Increase Transparency Infrastructure

Years 6–8

Evaluate Ecosystem Development

Publish Long-Term Reports

Strengthen Community Governance

Years 9–10

Finalize Experiment Data

Prepare Decade Review

Publish Constitutional Monetary Policy Findings

CONCLUSION

CJ4 is not built upon changing promises.

CJ4 is built upon known rules.

The project seeks to establish a transparent constitutional monetary framework and observe its effects over a ten-year period.

The community determines participation.

The constitution determines the rules.

The market determines value.

The passage of time determines the outcome.

This is the CJ4 Experiment.
